CATALOGO GENERALE

CERAMICA **VULCANO**

Con questi nuovi articoli Vulcano Ceramica vuole esprimere la professionalità raggiunta in 30 anni di esperienza nel settore produttivo della ceramica. Gli investimenti e gli sforzi profusi hanno avuto sempre l'unico obiettivo di realizzare un prodotto che vuole esaltare il "100% made in Italy" che rappresenta la creatività, qualità produttiva e lo stile apprezzato nel mondo per eleganza e originalità.

These new items underline the professionalism achieved in 30 years' experience by Vulcano Ceramica in the ceramics sector. The investments and efforts made, have always had as a goal the creation of a product aimed to enhance the "100% made in Italy" which represents creativity, product quality and style appreciated worldwide for originality and elegance.

Operai specializzati ispezionano e perfezionano ogni pezzo a mano. Lavorando con velocità ma attenta precisione, questi abili operai rifiniscono lunghe file di stampi con spugne e strumenti di levigatura, rimuovendo a mano ogni imperfezione e levigando le superfici.

Specialized artisans inspect and refine each piece by hand. Working with speed but careful precision, these skilled workers sweep down long rows of moduls, with sponges and specialty sanding tools in hand, as they remove any raw pieces and smooth away any rough surfaces.

JUMPER

Lavabi d'appoggio caratterizzati da una linea moderna, ricercata e innovativa. Un perfetto tecnicismo crea un inconsueto contrasto tra l'ampiezza dei lavabo e la leggerezza dei suoi bordi che misurano solo alcuni millimetri.

Countertop washbasins characterized by a modern and innovative design. A perfect technicality creates an usual contrast between the width of the bowl and the lightness of its edges, which measure only a few millimeters.

I lavabi d'arredo della Vulcano Ceramica Srl sono prodotti di design nell'arredamento della sala da bagno, sono made in Italy, interamente prodotti a mano ed hanno forme e colori adattabili ad ogni stile sia classico che moderno. Vulcano Ceramica è una realtà dinamica, produce un'ampia selezione di lavabi con le loro forme esclusive. La filosofia aziendale ha le sue radici nel design artistico ed emozionale italiano.

L'azienda si contraddistingue per la sua Alta Qualità, Flessibilità, Servizio al cliente. Operai specializzati ispezionano e perfezionano ogni pezzo a mano. Lavorando con velocità ma attenta precisione, questi abili operai rifiniscono lunghe file di stampi con spugne e strumenti di levigatura rimuovendo a mano ogni imperfezione e levigando le superfici.

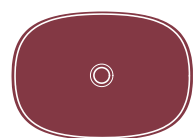

Il materiale con il quale sono realizzati è il Fire Clay, un impasto ceramico i cui componenti fanno sì che sia nella fase di collaggio che nella fase di cottura il lavabo mantenga inalterate le forme ritirandosi molto meno e permettendo a chi lo produce di rispettare delle forme più estreme come bordi fini o angoli retti. I lavabi d'arredo possono essere posti su piani o su mobili corredati da rubinetteria di design che si adatta alle altezze ed alle finiture. Infatti trovano molta approvazione da parte dei clienti le finiture nei colori matt ovvero opachi (bianco, nero, grigio, fango, ocre e verde aloe) che rendono il lavabo al tatto quasi vellutato a cui si possono abbinare rubinetti anch'essi con texture matt.

The decorative washbasins by Vulcano Ceramica Srl are design pieces for bathroom furnishing. They are made in Italy, entirely handcrafted, and feature shapes and colors that adapt to both classic and modern styles. Vulcano Ceramica is a dynamic company, offering a wide selection of washbasins with exclusive designs.

The company's philosophy is deeply rooted in Italian artistic and emotional design. It stands out for its High Quality, Flexibility, and Customer Service. Skilled artisans inspect and perfect each piece by hand. Working with speed and meticulous precision, these artisans refine long rows of molds using sponges and sanding tools, manually removing imperfections and smoothing surfaces.

The material used is Fire Clay, a ceramic blend whose components ensure that during both the casting and firing stages, the washbasin retains its shape, shrinking significantly less. This allows for the creation of more extreme designs, such as thin edges or sharp angles. The decorative washbasins can be placed on countertops or furniture, paired with designer faucets that match their height and finishes. Customers particularly appreciate the matte finishes (white, black, grey, fango, ocre and verde aloe), which give the washbasins a velvety feel to the touch and can be paired with faucets featuring matching matte textures.

BLADE

Lavabi di tendenza, design ed innovazione. La collezione è composta da tre lavabi dalle forme essenziali, i bordi extra-fini si riducono drasticamente conferendo al lavabo un effetto lama molto ricercato. Il progetto si completa con un piedino sotto-lavabo con dona al BALDE fissato al top un effetto di piacevole sospensione, disponibile nella sola versione appoggio senza foro rubinetto.

Trend washbasins, design and innovation. The collection composed of three countertop washbasins with their essential shapes and extra-thin esges drastically reduced, has a very refined BLADE effect. The supporting base gives the washbasin a touch of elegance and a suspended effect.

DOME

Lavabo a forma di cupola, ispirato dalle maestose opere architettoniche che caratterizzano l'Italia. Deve il suo design minimal chic al perfetto equilibrio tra le forme rinascimentali e barocche dei secoli XVI e XVII.

Dome è un lavabo da appoggio con bordi a spessore ridotto ed una giusta proporzione tra altezza e capacità della vasca.

Disponibile nella versione tutto tonda e obliqua.

Rounded cupola shape washbasin inspired by the majestic architectural works that characterize Italy. It owes its minimal chic design to the perfect balance between the Renaissance and Baroque forms of the 16th and 17th centuries.

Dome is a countertop washbasin with minimal thickness edges and a proper proportion between height and water capacity.

Available in full or oblique shape.

LIKE

Il lavabo appoggio LIKE si presenta come un bell'esempio di arredo contemporaneo, risultato di una ricerca di design minimale con le sue linee essenziali e tratti geometrici. Si tratta di un lavabo dalla forma squadrata, che implica una lunghezza che varia da 46 a 80 cm. Per questo motivo, il lavabo LIKE può essere inserito nei bagni di ampie misure come pezzo forte di un arredo semplice ma dal grande impatto estetico.

Countertop washbasin looks like a beautiful example of contemporary element. With its essential lines and geometric stylistic features, it is the result of a continuous search for minimal design. A square shaped washbasin with a length that varies from 46 to 80 cm, LIKE washbasin can be inserted in large bathrooms as a showpiece of a simple decor but with a great aesthetic impact.

QUADRA

Linee squadrate ma dolci contraddistinguono la serie Quadra, composta da vaso e bidet a terra filo muro e sospesi per arredare un bagno importante. Una serie di sanitari adattabile ad un arredo bagno moderno e concettualmente schematico, basico ma armonioso. Disponibile in bianco lucido, bianco opaco, nero opaco, grigio opaco o fango opaco.

Squared and sweet lines distinguish the Quadra sanitary set; is composed of a floor standing wc and bidet and wall hung wc and bidet that furnish an important bathroom. Quadra sanitaryware is adaptable to a modern bathroom furniture and conceptually schematic, basic but harmonious. Available in glossy white, matt white, matt black, matt grey or matt mud.

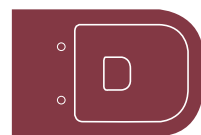

I sanitari sono una parte importante dell'arredamento di una casa. Fino a qualche decina di anno fa pochi consideravano la rilevanza del sanitario in un'abitazione, l'importante in una casa era che fosse installato qualsiasi forma avesse. Fortunatamente da un po' di anni la tendenza dell'arredo ha reso importanti anche questi oggetti rendendoli di design, evidenziando lo stile, le forme ed il colore. Dietro la creazione di una serie di sanitari c'è uno studio non indifferente perché non è sempre facile far combaciare linee di design, magari accattivanti per il cliente, con la funzionalità dell'oggetto. Ne consegue un attento studio ed un confronto continuo tra l'azienda ed il Designer e/o Architetto che ha ideato il sanitario.

Il materiale con il quale vengono realizzati i sanitari è la Vitreous-china, un impasto ceramico composto da terre ed acqua che dalla fase di collaggio alla fase di cottura, essendo più malleabile di altri tipi di impasto, subisce meno il ritiro. Le serie di sanitari ormai tendono ad essere quasi tutte rimless, ovvero con il bordo che scende delicatamente dentro allo scarico senza avere più la parte ceramica che crea un rientro sotto al quale si possono annidare germi e batteri. Sul mercato si trovano serie a terra e sospese per una maggiore igiene, considerando sempre che la ceramica è un materiale molto igienico per il bagno in quanto si pulisce con disinfettanti ed igienizzanti senza rovinarsi. Altra caratteristica molto importante è lo scarico dell'acqua che è stato ridotto e adattato a 3,5/4 lt permettendo un risparmio sui consumi. Anche i sanitari come i lavabi d'arredo si possono realizzare direttamente in bianco lucido classico o con colori matt, bianco, nero, grigio, fango, ocra e verde aloe, con una texture vellutata al tatto ed il copriwater abbinato dello stesso colore.

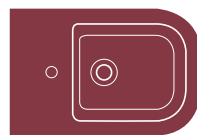

Sanitary wares are an essential part of a home's interior design. Until a few decades ago, their importance in a house was largely overlooked; the main concern was simply having them installed, regardless of their shape or style. Fortunately, in recent years, interior design trends have highlighted the significance of these items, transforming them into design elements that emphasize style, shape, and color. The creation of a series of sanitary wares involves significant research and effort, as it is not always easy to combine appealing design lines with the functionality of the product. This process requires careful study and ongoing collaboration between the company and the designer or architect who conceived the fixture.

Sanitary wares are made from vitreous china, a ceramic mixture composed of clay and water. This material, being more malleable than other types of ceramic blends, experiences less shrinkage during the casting and firing phases. Most modern sanitary wares are now rimless, meaning their edges slope gently into the drain without the ceramic overhang that could previously harbor germs and bacteria. Both free standing and wall-hung designs are available, the latter offering greater hygiene. Ceramic remains an ideal material for bathrooms as it can be cleaned with disinfectants and sanitizers without being damaged. Another crucial feature is the water discharge system, which has been optimized to use only 3.5 to 4 liters per flush, reducing water consumption. Like decorative washbasins, sanitary wares can be produced in classic glossy white or white, black, grey, fango, ocra and verde aloe matte finishes with a velvety texture. Matching matte-colored toilet seats can also be coordinated with the fixtures for a seamless look.

OVALE

Un design semplice e contemporaneo per questa linea di sanitari composta da vaso e bidet a terra filo muro e sospesi con e senza brida (rimless). Curve morbide e proporzioni geometriche si fondono per dar vita ad una serie di sanitari essenziale. Disponibile nella versione standard o traslata questa serie arreda in modo semplice ma concreto l'ambiente bagno adattandosi a spazi moderni o classici. Disponibile in bianco lucido, bianco opaco, nero opaco, grigio opaco o fango opaco.

A simple and contemporary design for this line of sanitary ware composed of floorstanding wc and bidet and wall hung rimless wc and bidet. Soft curves and geometric proportions merge and create a series of essential sanitary ware. Available in standard or adjustable floor standing version this sets furnishes the bathroom in a simple but concrete way, adapting to modern or classic spaces. Available in glossy white, matt white, matt black, matt grey or matt mud.

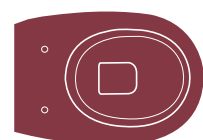

I sanitari sono una parte importante dell'arredamento di una casa. Fino a qualche decina di anni fa pochi consideravano la rilevanza del sanitario in un'abitazione, l'importante in una casa era che fosse installato qualsiasi forma avesse. Fortunatamente da un po' di anni la tendenza dell'arredo ha reso importanti anche questi oggetti rendendoli di design, evidenziando lo stile, le forme ed il colore. Dietro la creazione di una serie di sanitari c'è uno studio non indifferente perché non è sempre facile far combaciare linee di design, magari accattivanti per il cliente, con la funzionalità dell'oggetto. Ne consegue un attento studio ed un confronto continuo tra l'azienda ed il Designer e/o Architetto che ha ideato il sanitario.

Il materiale con il quale vengono realizzati i sanitari è la Vitreous-china, un impasto ceramico composto da terre ed acqua che dalla fase di colaggio alla fase di cottura, essendo più malleabile di altri tipi di impasto, subisce meno il ritiro. Le serie di sanitari ormai tendono ad essere quasi tutte rimless, ovvero con il bordo che scende delicatamente dentro allo scarico senza avere più la parte ceramica che crea un rientro sotto al quale si possono annidare germi e batteri. Sul mercato si trovano serie a terra e sospese per una maggiore igiene, considerando sempre che la ceramica è un materiale molto igienico per il bagno in quanto si pulisce con disinfettanti ed igienizzanti senza rovinarsi. Altra caratteristica molto importante è lo scarico dell'acqua che è stato ridotto e adattato a 3,5/4 lt permettendo un risparmio sui consumi. Anche i sanitari come i lavabi d'arredo si possono realizzare direttamente in bianco lucido classico o con colori matt, bianco, nero, grigio, fango, ocra e verde aloe, con una texture vellutata al tatto ed il copriwater abbinato dello stesso colore.

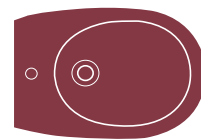

Sanitary wares are an essential part of a home's interior design. Until a few decades ago, their importance in a house was largely overlooked; the main concern was simply having them installed, regardless of their shape or style. Fortunately, in recent years, interior design trends have highlighted the significance of these items, transforming them into design elements that emphasize style, shape, and color. The creation of a series of sanitary wares involves significant research and effort, as it is not always easy to combine appealing design lines with the functionality of the product. This process requires careful study and ongoing collaboration between the company and the designer or architect who conceived the fixture.

Sanitary wares are made from vitreous china, a ceramic mixture composed of clay and water. This material, being more malleable than other types of ceramic blends, experiences less shrinkage during the casting and firing phases. Most modern sanitary wares are now rimless, meaning their edges slope gently into the drain without the ceramic overhang that could previously harbor germs and bacteria. Both free standing and wall-hung designs are available, the latter offering greater hygiene. Ceramic remains an ideal material for bathrooms as it can be cleaned with disinfectants and sanitizers without being damaged. Another crucial feature is the water discharge system, which has been optimized to use only 3.5 to 4 liters per flush, reducing water consumption. Like decorative washbasins, sanitary wares can be produced in classic glossy white or white, black, grey, fango, ocra and verde aloe matte finishes with a velvety texture. Matching matte-colored toilet seats can also be coordinated with the fixtures for a seamless look.

PERLA

Uno slancio verso l'alto è disegnato dalla serie Perla, una linea di sanitari composta da vaso e bidet a terra filo muro e sospesi che da un diametro ridotto si eleva a dimensioni più imponenti creando un impatto visivo molto piacevole. Le dimensioni infatti aumentano con grazia per creare una seduta comoda ed ampia. La serie Perla si adatta ad un arredo bagno sia moderno che classico. Disponibile in bianco lucido, bianco opaco, nero opaco, grigio opaco o fango opaco.

Perla set draws an upward momentum, a line of sanitary ware composed of floorstanding wc and bidet and wall hung wc and bidet; the small diameter rises to more impressive dimensions creating a very pleasant visual impact. Really the dimensions increase gracefully to create a comfortable and wide seat. Perla set of sanitaryware is suitable for both modern and classic bathroom furnishings. Available in glossy white, matt white, matt black, matt grey or matt mud.

DIAMANTE

Forme tondeggianti si rincorrono a formare onde o petali sovrapponendo la ceramica e creando giochi di luci ed ombre. Questa è la Serie Diamante, una serie composta da vaso e bidet a terra filo muro e sospesi che ben si adatta ad ambienti bagno accoglienti. Un po' come un quadro di Botero è una serie di sanitari dolcemente armonica. Disponibile in bianco lucido, bianco opaco, nero opaco, grigio opaco o fango opaco.

Rounded shapes chase each other to form waves or petals overlapping the ceramic and creating plays of light and shadow. This is the Diamante Set of sanitarywares, composed of floorstanding wc and bidet and wall hung wc and bidet that is well suited to welcoming bathroom environments. Like a Botero painting is a series of gently harmonic sanitary ware. Available in glossy white, matt white, matt black, matt grey or matt mud.

CLASSICA

Il nome della Serie Classica raccoglie in sé il senso del tutto, la ceramica crea onde e curve che si susseguono con dolcezza ricreando quello stile classico che non passa mai di moda. La serie Classica si compone di vaso e bidet a terra e versione vaso monoblocco. Per chi sa osare si può abbinare anche a rivestimenti moderni creando contrasti particolari. Disponibile in bianco lucido, bianco opaco, nero opaco, grigio opaco o fango opaco.

The name of the Classic Series collects in itself the sense of the whole, the ceramic creates waves and curves that follow each other gently recreating that classic style that never gets old. The Classica set is composed of floorstanding wc and bidet and wall hung wc and bidet and a monoblock wc version. Who can dare, it can also be match with modern coatings, to create particular reverses. Available in glossy white, matt white, matt black, matt grey or matt mud.

LAVANDERIA

Migliora la tua lavanderia per eguagliare lo standard di design del resto della tua casa con la collezione di lavatoi in ceramica. Con o senza foro per rubinetteria, tutta vasca o con strizzatoio incorporato, scegli il lavatoio in ceramica più adatto per il tuo mobile per una lavanderia che sia allo stesso tempo funzionale ed elegante.

Upgrade your laundry room to equal the design standard of the rest of your home with this durable laundry sinks. Choose either to have no tap hole or a single one, with or without incorporated washboard. Mount your laundry sink on cabinet to create the look you want for a laundry room that is both functional and stylish.

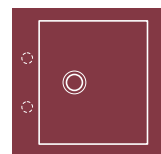

L'ambiente lavanderia da qualche anno sta vivendo una nuova fase di restyling, una nuova concezione che vede il lavatoio e il lavapanni in primo piano, rivisitato con stile e design moderno. I lavatoi della Vulcano Ceramica sono prodotti in Fire Clay, un impasto ceramico i cui componenti fanno sì che sia nella fase di colaggio che nella fase di cottura il lavatoio mantenga inalterate le forme ritirandosi molto meno. Nell'ambiente dei ceramisti si dice che è più "duro" permettendo a chi lo produce di rispettare delle forme più estreme come bordi fini o angoli retti. I lavatoi possono essere posti su piani o su mobili corredati da rubinetteria di design che si adatta alle altezze ed alle finiture.

Anche la lavanderia come i sanitari ed i lavabi d'arredo si possono realizzare direttamente in bianco lucido classico o con colori matt, bianco, nero, grigio, fango, ocra e verde aloe, con una texture vellutata al tatto ed il copriwater abbinato dello stesso colore.

The laundry area has recently undergone a phase of restyling, embracing a new concept that puts the laundry sink and washbasin in the spotlight, reimagined with modern style and design. The laundry sinks by Vulcano Ceramica are made from Fire Clay, a ceramic blend whose components ensure that during both the casting and firing processes, the sink retains its shape with minimal shrinkage. In the ceramics industry, Fire Clay is often referred to as "harder," allowing manufacturers to achieve more extreme designs, such as thin edges or sharp angles. The laundry sinks can be installed on countertops or furniture, paired with designer faucets that complement their height and finishes.

Like decorative washbasins and sanitary wares, laundry can be produced in classic glossy white or white, black, grey, fango, ocra and verde aloe matte finishes with a velvety texture. Matching matte-colored toilet seats can also be coordinated with the fixtures for a seamless look.
